8.65 cgpa

OS, DBMS, CN, Data Structures, Design and Analysis of Algorithms, OOPs(C++)

PROJECTS

Weather App
Weather App providing information about the weather conditions of a particular place.

The Weather App project utilizes HTML, CSS, JavaScript, and Rapid API to provide users with weather conditions information for specific locations. The user interface is designed using HTML and CSS, with elements like a search bar, weather display area, and relevant icons. The Rapid API fetches weather data, which is then parsed and displayed on the user interface. The Weather App offers quick and relevant weather information, allowing users to plan activities accordingly.

Movie Recommender System
A content based movie recommender system using cosine similarity

This is an algorithmic solution that suggests movies to users based on their preferences and historical data. It analyses vast amounts of movie-related information, such as user behaviour, movie ratings, reviews, genres, directors, and actors, to generate personalized recommendations.

IMDB clone
An IMDB clone in which we can search movies based on TMDB API, with search suggestions.

The IMDB Clone project is a React app that replicates the features of IMDb's movie database website. Utilizing React.js as the primary framework and the TMDB API for movie data fetching, the app offers a user-friendly experience. The IMDB Clone features a search bar with real-time suggestions, dynamically populated sections for upcoming, popular, and top-rated movies, and a carousel at the top to showcase movies as hero banners. The IMDB Clone project allows users to browse and discover movies in an intuitive and interactive manner.

ACTIVITIES/HOBBIES

Cryptec committee
Put my public speaking and organizational skills to use by hosting Cryptec events.

NMIT MUSIC CLUB
An intermediate level guitarist ,performed at different undergrad colleges.

ANAADYANTA EVENT COORDINATOR
Hosted cultural events for inter-college participants during the annual techno-cultural fest.

Reading Books
I've read books in a variety of genres, including fiction, thrillers, historical fiction, and novels on war. Erich Segal, Khalid Hosseini, and Dan Brown are a few of the authors I enjoy reading

SKILLS

C/C++	Python	HTML5/CSS	JavaScript
SQL	Data Structure and Algorithm	Java
